

Blandin Foundation™  
STRENGTHENING RURAL MINNESOTA

FOR IMMEDIATE RELEASE

## **Martin County selected as a Blandin Broadband Community**

*Two-year partnership provides planning, technical and financial support to help county meet its digital technology goals*

Brainerd, Minn. (November 20, 2014) – Blandin Foundation announced today that Martin County leaders were successful in their application to become a Blandin Broadband Community, one of only 10 selected in the state. The announcement was made today in Brainerd, before more than 140 participants in the *Border to Border Broadband: No Community Left Behind* conference, co-sponsored by Blandin and Connect Minnesota.

The Blandin Broadband Communities program is an intensive, two-year partnership between Blandin Foundation and selected rural Minnesota communities. The program provides planning, technical and financial support to communities that demonstrate the determination to bring the benefits of a broadband-enabled economy to their communities.

Martin County is one of ten new rural Minnesota communities that will join nine previously-named Blandin Broadband Communities in the state. Other Blandin Broadband Communities announced today are the Central Woodlands (east central Minnesota), Resilient Region 5 (north central Minnesota), Sherburne County, Chisago County, Redwood County, Renville/Sibley Counties, Red Wing, Nobles County, and Carlton County.

“At Blandin Foundation we recognize that broadband access – and the skills to use it -- are essential to expanding opportunity for all. Thanks to community leaders in Martin County and in the other communities with whom we partner, Minnesota is making important strides toward ensuring that rural places and the economically and socially disadvantaged are not left behind,” said Bernadine Joselyn, Director of Public Policy and Engagement.

Communities were selected based on demonstrated commitment to work together across sectors to set and meet information technology goals and bridge digital divides.

Martin County hopes to increase access to computers and enhance skills and connectivity for all community members. There is a need for a better broadband opportunity and experience for our residents and businesses county wide. This will provide an opportunity that will benefit the residents and business in Martin County.
